

Problem of the Week

Problem D

Let's Make A Deal

An automobile dealer purchased two cars. She then sold the cars, the first at a profit of 40% and the second at a profit of 60%. Her total profit on the sale of the two cars was 54%. She received a total of \$88 704 from the sale of the two cars.

What did the dealer originally pay for each of the two cars?
